

# TechChurch CTO ON DEMAND SERVICES

When it comes to technology  
**you do not have to do it alone**

Our CTO On Demand service for churches and faith-based organizations allows you to access top technical leadership for a fraction of the cost of hiring someone.

It's not uncommon that for many churches, their technology needs are handled by both internal and external resources including contractors, consultants and other third-party vendors. This requires a skilled hand in coordinating the communication and management of all of these moving parts while keeping the overall vision and mission of the ministry in focus.

## **Our CTO On Demand Services are comprised of the following service offerings**

- IT & Infrastructure Assessment
- Strategic Vision & Planning
- Tech Advisory
- Vendor Negotiations & Management
- Project Management
- Cybersecurity
- Product Development
